Field of Interest

- Political Economy of Development, especially in oil and mining-exporting countries in

all regions, with emphasis on the role of state enterprises in natural resource development and strategies in poverty reduction and mitigating social conflicts in the resource sector.

- Critical Minerals and Clean Energy Transition, focussing on how mineral exporters can design industrial strategies in the context of green growth as well as the role of manufacturing companies and governments in East Asia and Europe in reshaping the value chains of clean technologies sectors.
- Developmental states and industrial policy, especially on state-business relations, coalition-building, and the politics of industrial upgrading in middle-income countries.
- Contentious Politics and Democratization, especially in Latin America and Southeast Asia, drawing from social movements perspectives.
- Qualitative Comparative Analysis (QCA), combined with process tracing, causal narratives, and small-N comparisons, and field-based data collection in developing country contexts.

Field Research

- Brazil (2022, 2021, 2018, 2014, 2013, 2010)
- Chile (2017, 2012, 2009)
